PORTFOLIO

ABOUT ME:

I am a 19 year old ambitious Egyptian graphic designer.
I have self-learned everything I know right now, I never took courses or
classes.

I will give you a summary about my story; my parents forced me to enter university here in Egypt, in a major I do not want (dentistry), I recently applied to university of Sunderland because I want to experience life by myself, and I think that this will be one of the best decisions of my life.
My main style in anything work-related is simple but catchy, I like to have an aesthetically pleasing vibe in all my work.

Regarding the 'artistic' designs I make, they are simply me speaking my mind , i like to use glitching and distortion in most of my artistic work.

I make every design out of pure passion and love.

Why do I want a job? To be able to support myself because I won't have my parent's support once I travel.
